

Madilynn Wright

289-388-7455 | madilynnwright@icloud.com | [Personal Web](#) | [LinkedIn](#) | [Github](#)

SKILLS

Languages: Python, TypeScript, JavaScript, Java, C/C++, HTML/CSS, SQL, R, JAX, PyTorch
Cloud & Data: Azure Machine Learning, Supabase, Database Management, Data Processing, API Integration
Development: React, Next.js, Node.js, REST APIs, WebSockets, Tailwind CSS, Component-Based Architecture
Tools/Practices: Git/GitHub, Docker, JUnit, Jira, Agile/Scrum, CI/CD, Figma
Other: ML, Data Structures & Algorithms, Software Testing, Cloud Computing, Technical Research

EXPERIENCE

AI Developer Co-op

May 2026 – Present

Ideon Technologies | *Python, JAX, Git, Jira, Azure Machine Learning*

- Develop AI-powered internal software tools that automate workflows and reduce manual processes
- Translate technical and user requirements into scalable solutions, collaborating across technical and non-technical teams
- Contribute to model development through research, experimentation, training, testing, and architecture decisions
- Document, evaluate, and improve solutions through iterative development and feedback

Co-President (Former Software Developer)

Apr. 2026 – Present

UBC Startups | *React, JavaScript, Git, Jira*

- Elected Co-President of a student startup community, leading strategy, operations, and execution across technical and non-technical teams
- Coordinate cross-functional teams to deliver events, products, and partnerships
- Contributed to frontend development, building and refining UI components for our web platforms

Software Team Lead (Former Frontend Developer)

Sep. 2025 – June 2026

UBC MINT | *TypeScript, React, REST APIs, WebSockets, Git*

- Promoted to lead frontend development for an open-source neurotechnology platform across 3+ teams
- Built real-time data visualization interfaces, improving system responsiveness and usability
- Established Git workflows (PRs, reviews, branching), reducing integration issues and improving team velocity

PROJECTS

Stack or Crack | *Next.js, TypeScript, Claude Haiku, Tailwind*

- Built a full-stack AI platform where users design tech stacks and receive automated feedback to navigate the AI realm
- Integrated LLMs (Claude Haiku API) to generate structured, tool-level evaluations from user input
- Designed a modular component architecture to support maintainable code and rapid feature development

Relinkd | *React, TypeScript, Node.js, Supabase, PostgreSQL, Claude Haiku*

- Developed an end-to-end platform connecting volunteers with nonprofit organizations
- Built frontend components, backend APIs, and database integrations across the full application stack
- Implemented real-time SMS workflows using Twilio and developed analytics dashboards to support nonprofit outreach
- Integrated third-party APIs and services while managing application data through Supabase and PostgreSQL

EDUCATION

BSc Combined Major in Science, Specializing in Computer Science (in-progress)

UBC, Vancouver

Relevant courses: Software Construction; Introduction to Computer Systems; Basic Algorithms and Data Structures; Introduction to Relational Databases; Applied Machine Learning
